DETAILED ACTION

1. Claims 1, 3-8, 10-12, 14-19, 30, and 32-35 are pending. Claims 1, 3-8, and 12 have been amended in this communication filed 03/13/07 entered as Response After Non-Final Action.

2. The IDS filed 1/12/07 has been reviewed and entered.

Allowable Subject Matter

3. Claims 1, 3-8, 10-12, 14-19, 30, and 32-35 are allowed.

4. The following is an examiner's statement of reasons for allowance: The closest art of record is by Fredman, M.L., entitled "The complexity of information structures" discloses a record which is associated with the key associated with a record uniquely identifying a record and belongs to a set referred to as the key space, the value associated with the records being summed by a commutative addition operation but fails to disclose summing the sizes of all of the data records below the ranking of the new data record and ending the process by returning a failure indicator with an indication that the database data structure is unable to store the new data record in the identified section if the sum is not greater than the size of the new data record. Sockut et al (US5,721,915) disclosed a unique key used to identify data records and sorting but failed to disclose summing the sizes of all of the data records below the ranking of the new data record and ending the process by returning a failure indicator with an indication that the database data structure is unable to store the new data record in the identified section if the sum is not greater than the size of the new data record. For

these reasons claims 1, 8, 12, and 30 are deemed to be allowable over the prior art of record, and claims 3-7, 10, 11, 14-19, and 32-35 are allowed by dependency.

5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

David H.C. Du and Sheau-Ru Tong entitled "Multilevel Extendible Hashing: A File Structure for Very Large Databases".
